

Component	Amount	Use in Project	Total Cost
7semi ESP32-S3 Dev BoardC-1U-N8R8 WiFi BLE Development Board 8MB Flash 8MB PSRAM	2	They are main microcontroller used in avoincs bay and ground station.	923
SmartElex LoRa Module Ra- 02 SX1278 433Mhz Wireless Transmission Breakout Board	2	They send/recieve data from rocket to ground station module.	1616
1.3 inch I2C OLED Display Module	1	It will be on top of ground station module and show health check of avionics bay.	272
1S 18650 Li-ion Battery BMS Charger Protection Board 3.7V	1	Im using 1*18650 battery and gonna add charging option to it so it protects the battery.	39
Ublox Neo-6M GPS Module With EEPROM	1	Its a GPS module which i will fuse with barometer and IMU's to get accurate 3d visualization of rocket mid-flight.	269
Some wires and usb 2.0 A to B Cable	Depends	Wires for wiring and cable to connect ground station to laptop/pc	289
Total Cost			₹4,365.00

Note - I dont know exactly how to write BOM as its my first time so im gonna include all relevant info i could add like supplier , price etc.

****IMPORTANT**** - Supplier is Robocraze.com and all cost are in INR (Indian currency.) and Total cost (after discounts and taxes) is INR ₹4,365.00
